

How to use the SlidesLive Recorder app

1. Get ready

Download the SlidesLive Recorder app from slideslive.com/download and launch it.

2. Record

The SlidesLive app will capture all the visual content you show during your talk and automatically sync it with your video.

Start recording on your camera/phone and in the SlidesLive app.
Stop recording when you finish presenting. You can find your slides in the Presentation folder.

3. Upload & Sync

To upload your talk, open the link studio.slideslive.com/recorder_app/uploads/test.

Click on the **Add recording** button and select the folder with the slides recording. Repeat the same process for the camera recording. Then click on **Start upload**.

The app will sync your slides with the video, and your talk will be ready on the SlidesLive website soon!
